#### How To Control Flies

Control of the house fly consists in destruction of its breeding places. The house fly usually breeds in manure, although as second choice, it may frequent any sort of decaying vegetation. The flies which become so troublesome around the average farm homestead usually originate on the premises, because, under ordinary conditions, flies will not travel more than a mile.

Fortunately, control of house flies coincides with the most economical way of handling manure. If the manure is applied to the field immediately, it will not become the breeding place for flies.

Madam, if your husband is like most men, he expects you to look after the health of yourself and children. Coughs and colds are the most common of the minor ailments and are most likely to lead to serious diseases. A child is much more likely to contract diphtheria or scarlet fever when it has a cold. If you will inquire into the merits of the various remedies that are recommended for coughs and colds, you will find that Chamberlain's Cough Remedy stands high in the estimation of people who use it. It is prompt and effectual, pleasant and safe to take, which are qualities especially to be desired when a medicine is intended for children. For sale by all dealers.

#### McMahan-Pleyer

The marriage of Mr. Albert McMahan and Miss Serena Pleyer, which took place on Sunday afternoon, March 10 at 2:30 was a great surprise to the many friends of the popular young people.

The ceremony was performed by Rev. Hise at his home. The attendants were, Miss Mary Pleyer, sister of the bride and Mrs. Raymond King. After the ceremony the party returned to the home of the bride, where a delicious supper was served.

Mr. McMahan has a large number of friends and is an industrious and capable young man of the Bynumville neighborhood. He will engage in farming with his father, who owns a large farm east of Bynumville. His bride, who is a school teacher, is a most estimable and worthy young lady from the Hamden vicinity, and numbers her friends by her acquaintances.

## 22 Million Families in the United States

### 4 CUPS OF WHEAT FLOUR TO THE POUND

If each family used 4 cups of flour less per week, the saving would be 22 million pounds or 112,244 barrels every week.

The greatest help housekeepers can give to win the war is to make this saving and it can be done by using this recipe in place of white flour bread.

#### Corn Meal Biscuits

$\frac{3}{4}$  cup scalded milk  
1 cup corn meal  
2 tablespoons shortening  
 $\frac{3}{4}$  teaspoon salt  
1 cup white flour  
4 teaspoons Dr. Price's Baking Powder

Save  $\frac{1}{4}$  cup of the measured flour for board. Pour milk over corn meal, add shortening and salt. When cold, add sifted flour and baking powder. Roll out lightly on floured board. Cut with biscuit cutter and bake in greased pan fifteen to twenty minutes.
